

WALLS + CEILINGS PANEL [PINE CORE]

MADERA Pine core Panels are intended for application on walls + ceilings and can be specified in fixed lengths up to twenty feet. They're made with 2mm thick natural oak sawn lamellas in various grades up to fifteen inches wide on a Pine core. Wall + ceiling panels feature a custom tongue and groove profile for easy installation, and are available in all Madera finishes, various dimensions, and multiple grades.
